

# MDN Data Competition

## Instructions

Thank you for your interest in McGill Data Network's Data Competition! In the drive folder, you will find two CSV files:

- **Past\_Students.csv** is your **training dataset**, meaning you will create your prediction model using this data (feel free to use statistical models such as regression or other machine learning models such as decision trees and random forest)
- **Graduating\_Class.csv** is your **test dataset**, meaning you will create predictions for these students using your model.

The competition deadline is **January 27th at 11:59 pm**. To submit your results, please fill out the **Submission Form** and include the following:

- The code used to make your model and predictions (feel free to use Excel, Python, R, etc.). Please title this file "[Insert Full Name of Team Member #1]\_Code" (eg: "John\_Smith\_Code")
- The Graduating\_Class.csv with an additional column titled Chance\_of\_Admit containing your predictions for a chance of admission. Please title this file "[Insert Name of Team Member #1] Results"(eg: "John\_Smith\_Results")

To be eligible to participate, you must fill out the **Registration Form**. Please do not hesitate to contact us if you have any questions. **Good luck!**
